

WavesAI Academy

Complete Video Recording Guide

Scripts & Instructions for All 49 Lessons

8 Modules | 49 Video Lessons | Word-for-Word Scripts
Recording Setup Guide | Loom Instructions | Screen Tips

Everything you need to record professional course videos
even if you have never recorded a video before.

Table of Contents

Recording Setup Guide

What You Need | Loom Setup | Recording Tips | Video Types | What to Show on Screen

Module 1: AI Fundamentals & Claude AI

- 1.1 Welcome to WavesAI Academy
- 1.2 What is AI? (No Jargon Version)
- 1.3 The AI Business Landscape in 2025
- 1.4 Setting Up Your AI Toolkit
- 1.5 Your First AI Win - Build a Lead Magnet in 30 Minutes

Module 2: Content Creation Mastery

- 2.1 AI Content Strategy - Planning What to Create
- 2.2 Writing with Claude AI - Prompts That Actually Work
- 2.3 Creating Blog Posts & Articles at Scale
- 2.4 AI Image Generation with Leonardo AI
- 2.5 Social Media Content Factory
- 2.6 Content Repurposing - One Piece, Ten Platforms
- 2.7 Building a Content Calendar with AI

Module 3: Voice & Video AI Agents

- 3.1 Introduction to AI Voice Technology
- 3.2 Building Your First AI Voice Agent
- 3.3 AI Video Creation with D-ID & HeyGen
- 3.4 Text-to-Speech - Creating Professional Voiceovers
- 3.5 AI Avatars for Business Communication
- 3.6 Automating Video Content Production
- 3.7 Live Demo - Building a Complete Video Agent

Module 4: No-Code Automation

- 4.1 Introduction to No-Code AI Tools
- 4.2 Building Workflows with Make
- 4.3 Zapier AI Automation Masterclass
- 4.4 Connecting AI Tools - APIs Made Simple
- 4.5 Building AI Chatbots Without Code
- 4.6 Automation Templates You Can Use Today

Module 5: AI SEO & Marketing

- 5.1 AI SEO Fundamentals
- 5.2 Keyword Research with AI Tools
- 5.3 AI-Powered Content Optimisation
- 5.4 Local SEO & Google Business AI
- 5.5 AI Email Marketing Automation
- 5.6 Paid Advertising with AI
- 5.7 Building Your AI Marketing Stack

Module 6: AI Sales & Leads

- 6.1 AI Lead Generation Strategies
- 6.2 Building AI Sales Funnels
- 6.3 AI Cold Email & Outreach
- 6.4 CRM Automation with AI
- 6.5 AI Sales Coaching & Call Analysis
- 6.6 Closing Deals with AI Assistance

Module 7: White-Label AI SaaS

- 7.1 Introduction to White-Label AI
- 7.2 Setting Up Your AI SaaS Product
- 7.3 Pricing & Packaging AI Services
- 7.4 Client Onboarding Automation
- 7.5 Building Your AI Agency Brand
- 7.6 Scaling Your AI Agency

Module 8: Ethics, Legal & Scaling

- 8.1 AI Ethics & Responsible Use
- 8.2 Legal Considerations for AI Businesses
- 8.3 Data Privacy & GDPR Compliance
- 8.4 Scaling Your AI Business
- 8.5 Your AI Business Launch Plan

How to Record Your Course Videos

What You Need

- Computer with webcam (or phone)
- Loom (free) - loom.com - for screen recordings with face bubble
- Good lighting (face a window or use a desk lamp)
- Quiet room
- The scripts in this document

Loom Setup (5 Minutes)

1. Go to loom.com and create a free account
2. Install the Loom Chrome extension or desktop app
3. Click the Loom icon to open the recorder
4. Choose "Screen + Camera" (this records your screen AND shows your face in a small circle)
5. Select "Current Tab" for screen recording
6. Click "Start Recording"
7. When done, click the stop button
8. Loom gives you a download link - download as MP4

Recording Tips

- Look at the camera, not the screen
- Speak slowly and clearly - you can always speed up later but can't slow down
- It's OK to make mistakes - just pause, take a breath, and redo that sentence
- Keep each video between 5-15 minutes
- Record in a well-lit room, natural light is best
- Wear a solid colour top (no busy patterns)
- Have water nearby
- Record one module per session to stay consistent

Video Types

1. TALKING HEAD - Just you speaking to camera (for introductions, motivational parts)

Loom: Choose "Camera Only"

2. SCREEN SHARE WITH FACE - Show your screen while your face is in the corner (for demos, walkthroughs)

Loom: Choose "Screen + Camera"

3. SCREEN SHARE ONLY - Just your screen (for detailed software tutorials)

Loom: Choose "Screen Only"

What to Show on Screen

- **For AI tool demos:** Open the tool (ChatGPT, Leonardo AI, etc.) and show it live
- **For concept lessons:** Open a Google Slides presentation with key points
- **For walkthroughs:** Open the actual website/tool and click through it
- **Tip:** Have the script open in a small window on one side of your screen as a teleprompter

MODULE 1

AI Fundamentals & Claude AI

5 Lessons | ~43 minutes total recording time

- 1.1** Welcome to WavesAI Academy (5 min | Talking Head)
- 1.2** What is AI? (No Jargon Version) (8 min | Screen Share + Face)
- 1.3** The AI Business Landscape in 2025 (8 min | Screen Share + Face)
- 1.4** Setting Up Your AI Toolkit (10 min | Screen Share + Face)
- 1.5** Your First AI Win - Build a Lead Magnet in 30 Minutes (12 min | Screen Share + Face)

Lesson 1.1: Welcome to WavesAI Academy

Duration: 5 min | Video Type: Talking Head

SCRIPT:

Hi and welcome to WavesAI Academy! I'm [YOUR NAME] and I'm so excited to have you here. Over the next 8 modules, you're going to learn everything you need to build a profitable AI-powered business from scratch. Now here's the thing - you don't need to be a tech expert. You don't need to know how to code. Everything I'm going to teach you is designed for complete beginners. By the end of this course, you'll know how to: - Use AI tools like ChatGPT, Claude, and Leonardo AI to create content in minutes - Build AI voice agents that answer calls for you - Create automated marketing systems that run while you sleep - Set up your own AI SaaS business with white-label tools - And even resell this very course for profit if you're on the Business MRR tier Each module builds on the last, so I recommend going through them in order. Take your time, do the exercises, and most importantly - take action. The people who get results are the ones who actually implement what they learn. Let's get started!

Lesson 1.2: What is AI? (No Jargon Version)

Duration: 8 min | Video Type: Screen Share + Face

ON SCREEN:

Open a Google Slides presentation with simple bullet points

SCRIPT:

Before we dive into the tools, let's make sure we're all on the same page about what AI actually is - in plain English, no technical jargon. Think of AI like a really smart assistant. You give it instructions, and it does the work for you. The better your instructions, the better the results. There are a few types of AI you'll use in this course: First - Text AI. This is tools like ChatGPT and Claude. You type a question or request, and it writes back. You can ask it to write emails, blog posts, sales pages, social media captions - anything with words.

ON SCREEN:

[SHOW ON SCREEN: Open ChatGPT and type a simple prompt like 'Write me a 3-line Instagram caption about morning coffee']

See? I just asked it to write a caption and it did it in seconds. That would've taken me 10 minutes to think of. Second - Image AI. Tools like Leonardo AI and Midjourney. You describe what you want to see, and it creates the image. No design skills needed.

ON SCREEN:

[SHOW ON SCREEN: Open Leonardo AI and show a quick image generation]

Third - Voice AI. This is where it gets really exciting. Tools like ElevenLabs can clone your voice, and platforms like Vapi let you build AI phone agents that can answer calls, book appointments, and qualify leads. Fourth - Video AI. Tools like D-ID and HeyGen create AI avatar videos. You type a script and a realistic avatar reads it on camera. And finally - Automation AI. Tools like Make and Zapier connect everything together so it runs automatically. The big picture is this: AI does the repetitive work so you can focus on growing your business. Throughout this course, we'll use every single one of these types. Don't worry about remembering all of this now - we'll go deep into each one in the coming modules.

Lesson 1.3: The AI Business Landscape in 2025

Duration: 8 min | **Video Type:** Screen Share + Face

ON SCREEN:

Browser showing AI industry stats or a simple slide deck

SCRIPT:

Let's talk about why NOW is the perfect time to start an AI business. The numbers are incredible. The AI market is projected to be worth over 300 billion pounds by the end of 2025. And here's what's important for us - most businesses haven't adopted AI yet. They know they should, but they don't know how. That's where you come in. There are several ways to make money with AI right now: 1. AI Services - Offer AI-powered services to local businesses. Things like AI chatbots, automated email marketing, AI content creation. A single client can pay you 500 to 2000 pounds per month. 2. AI Products - Create digital products using AI. Ebooks, courses, templates, stock images. You create them once with AI and sell them forever. 3. AI SaaS - Set up white-label AI software and sell it as your own product. We'll cover this in Module 7. 4. AI Agency - Combine multiple AI services into an agency model. This is the most scalable option. 5. Course Reselling - If you're on our Business MRR tier, you can resell this very course and keep 50% of every sale. The key advantage you have right now is that AI is still new enough that most people are confused by it. By the time you finish this course, you'll understand it better than 95% of business owners out there. That gap between what you know and what they know - that's your opportunity.

Lesson 1.4: Setting Up Your AI Toolkit

Duration: 10 min | **Video Type:** Screen Share + Face

ON SCREEN:

Open each tool's website as you mention it

SCRIPT:

In this lesson, we're going to set up all the AI tools you'll need for the course. I'll walk you through each one. Open your browser and follow along with me. Tool 1: ChatGPT

ON SCREEN:

[SHOW: Go to chat.openai.com]

Click 'Sign up' and create a free account. The free version is powerful enough to start. Later you might want the Plus plan at 20 dollars a month, but it's not required for this course. Tool 2: Claude AI

ON SCREEN:

[SHOW: Go to claude.ai]

This is made by Anthropic and it's excellent for longer content and detailed analysis. Create a free account here too. Tool 3: Leonardo AI

ON SCREEN:

[SHOW: Go to leonardo.ai]

This is for image generation. Sign up for the free plan - you get 150 tokens per day which is plenty to start. Tool 4: ElevenLabs

ON SCREEN:

[SHOW: Go to elevenlabs.io]

This is for AI voice generation. The free plan gives you 10,000 characters per month. Tool 5: Make.com

ON SCREEN:

[SHOW: Go to make.com]

This is for automation - connecting your AI tools together. The free plan includes 1,000 operations per month. Tool 6: Canva

ON SCREEN:

[SHOW: Go to canva.com]

You probably already know Canva, but we'll use it alongside AI for creating graphics and social media posts. Now, you don't need to master all of these right now. We'll go deep into each tool in the relevant module. For now, just make sure you have accounts created so you're ready to go. One tip - use the same email for all your AI tools. It makes managing them much easier.

Lesson 1.5: Your First AI Win - Build a Lead Magnet in 30 Minutes

Duration: 12 min | **Video Type:** Screen Share + Face

ON SCREEN:

Live demo in ChatGPT and Canva

SCRIPT:

Time for your first hands-on project! We're going to build a complete lead magnet in 30 minutes using AI. This is something you could sell or use to attract customers. A lead magnet is a free resource you give away in exchange for someone's email address. It could be a checklist, a guide, a template pack - anything valuable. Let's build one right now. Follow along with me. Step 1: Choose your topic

ON SCREEN:

[SHOW: Open ChatGPT]

I'll type this prompt: 'Give me 5 lead magnet ideas for a small business owner who wants to use AI but doesn't know where to start. Each should be something I can create in under 30 minutes.'

ON SCREEN:

[Read out the suggestions ChatGPT gives]

Let's go with one, for example 'The AI Starter Kit: 10 AI Tools Every Small Business Needs' Step 2: Generate the content Now I'll prompt ChatGPT: 'Create a complete guide called The AI Starter Kit: 10 AI Tools Every Small Business Needs. For each tool, include the name, what it does, who it's for, the free plan details, and one quick win they can try today. Make it friendly and jargon-free.'

ON SCREEN:

[Show ChatGPT generating the content]

Look at that - we have a complete guide in about 30 seconds. Let's copy this. Step 3: Design it

ON SCREEN:

[SHOW: Open Canva]

Search for 'ebook' or 'lead magnet' template. Pick a clean, professional one. Now paste in our AI-generated content, adjust the fonts and colours, add your branding.

ON SCREEN:

[Walk through basic Canva editing]

Step 4: Export Click 'Share' then 'Download' and choose PDF. And there you have it - a professional lead magnet created in under 30 minutes. You could use this to build an email list, give it away on social media, or bundle it with your services. This is the power of AI - what used to take days now takes minutes. And this is just the beginning.

MODULE 2

Content Creation Mastery

7 Lessons | ~62 minutes total recording time

- 2.1** AI Content Strategy - Planning What to Create (8 min | Screen Share + Face)
- 2.2** Writing with Claude AI - Prompts That Actually Work (10 min | Screen Share + Face)
- 2.3** Creating Blog Posts & Articles at Scale (10 min | Screen Share + Face)
- 2.4** AI Image Generation with Leonardo AI (10 min | Screen Share + Face)
- 2.5** Social Media Content Factory (8 min | Screen Share + Face)
- 2.6** Content Repurposing - One Piece, Ten Platforms (8 min | Screen Share + Face)
- 2.7** Building a Content Calendar with AI (8 min | Screen Share + Face)

Lesson 2.1: AI Content Strategy - Planning What to Create

Duration: 8 min | **Video Type:** Screen Share + Face

ON SCREEN:

Slides or document with content strategy framework

SCRIPT:

Welcome to Module 2! Now that you understand AI, let's use it to create content that actually grows your business. Before we start creating, we need a strategy. Random content gets random results. Strategic content builds your audience and brings in customers. Here's the framework I use: The Content Pyramid has three levels: Top of Pyramid - Awareness Content. This is what gets new people to discover you. Think social media posts, short videos, blog posts. AI is perfect for creating this at scale. Middle - Education Content. This builds trust. Guides, how-to articles, email sequences. Show people you know what you're talking about. Bottom - Conversion Content. This turns followers into customers. Case studies, testimonials, sales pages, comparison posts. You need all three types. Most people only create awareness content and wonder why no one buys. Now let me show you how to plan a month of content in 10 minutes with AI.

ON SCREEN:

[SHOW: Open ChatGPT]

Prompt: 'I run an AI consulting business targeting small business owners in the UK. Create a 30-day content calendar with one piece of content per day. Mix awareness, education, and conversion content. Include the topic, type of content, and which platform to post it on.'

ON SCREEN:

[Show results]

See? A full month planned in seconds. You can adjust this to your specific business. The key is consistency - posting regularly matters more than posting perfectly.

Lesson 2.2: Writing with Claude AI - Prompts That Actually Work

Duration: 10 min | **Video Type:** Screen Share + Face

ON SCREEN:

Claude AI open with demonstrations

SCRIPT:

The quality of your AI output depends entirely on the quality of your prompts. In this lesson, I'll show you the prompting framework that makes everything better. I call it the CRISP framework: C - Context: Tell the AI who you are and who you're writing for R - Role: Tell the AI what role to play I - Instructions: Be specific about what you want S - Style: Define the tone and format P - Parameters: Set boundaries like word count, number of points Let me show you the difference.

ON SCREEN:

[SHOW: Open Claude AI]

Bad prompt: 'Write me a blog post about AI'

ON SCREEN:

[Show the generic result]

Now watch this. Good prompt using CRISP: 'Context: I run WavesAI Academy, an online course teaching beginners how to use AI for business. Role: You are an expert AI educator who explains complex topics in simple language. Instructions: Write a blog post about 5 ways small businesses can use AI today to save time. Style: Conversational, friendly, use short paragraphs and bullet points. No jargon. Parameters: 800 words, include a call to action at the end to check out our course.'

ON SCREEN:

[Show the much better result]

See the difference? Night and day. Save this framework and use it every time you write a prompt. Here are 5 more prompt templates you can copy:

ON SCREEN:

[Show each template on screen, explain briefly]

1. For social media: 'Write 5 [platform] posts about [topic] for [audience]. Tone: [casual/professional]. Include a hook in the first line and a call to action.' 2. For emails: 'Write a [type] email to [audience] about [topic]. Goal: [what you want them to do]. Length: [short/medium]. Include a subject line.' 3. For blog posts: 'Write a [word count] blog post about [topic] targeting [audience]. Include [number] subheadings, practical examples, and a conclusion with next steps.' 4. For sales copy: 'Write a sales page for [product] priced at [price]. Target audience: [who]. Main benefit: [what]. Include testimonials placeholders, FAQ section, and urgency element.' 5. For ideas: 'Give me [number] ideas for [type of content] about [topic] that would appeal to [audience]. For each idea, include a catchy title and one-line description.' Practice makes perfect. The more you use these, the better you'll get at prompting.

Lesson 2.3: Creating Blog Posts & Articles at Scale

Duration: 10 min | **Video Type:** Screen Share + Face

ON SCREEN:

Claude/ChatGPT + WordPress

SCRIPT:

Now let's put your prompting skills to work and create blog content at scale. I'm going to show you how to create a week's worth of blog posts in one sitting. Step 1: Topic research

ON SCREEN:

[SHOW: Open Claude or ChatGPT]

Prompt: 'I need 7 blog post topics about AI for small businesses. Each should target a specific long-tail keyword. Include the keyword, a suggested title, and a brief outline.' Step 2: Write the first post Let's take the first topic and create a full post.

ON SCREEN:

[Show writing a complete blog post with AI, editing it, adding personal touches]

Step 3: The editing process Never publish AI content without editing. Here's my 3-step editing process: - Read it aloud - does it sound like you? - Add personal stories or examples from your experience - Remove any AI-sounding phrases like 'in today's digital landscape' or 'it's important to note' Step 4: Batch the rest Now repeat for the remaining 6 posts. With practice, you can write 7 posts in about 2 hours. This is how you build authority and SEO traffic without spending all week writing.

Lesson 2.4: AI Image Generation with Leonardo AI

Duration: 10 min | **Video Type:** Screen Share + Face

ON SCREEN:

Leonardo AI dashboard

SCRIPT:

Visual content gets more engagement than text alone. In this lesson, I'll show you how to create stunning images with Leonardo AI.

ON SCREEN:

[SHOW: Open Leonardo AI]

First, let me show you around the dashboard. Here's where you create images, here's your generation history, and here's your token count. Let's create some images for a social media post. Click 'Create New Image'. Now the prompt is everything. Let me show you good versus bad prompts. Bad: 'A business meeting'

ON SCREEN:

[Show generic result]

Better: 'A modern diverse team of 4 people having an enthusiastic meeting in a bright office with large windows, laptops open, sticky notes on glass wall, natural lighting, professional photography style, 16:9 aspect ratio'

ON SCREEN:

[Show much better result]

Here are prompt tips for Leonardo: - Be specific about the scene, lighting, style, and mood - Include the aspect ratio you need (16:9 for YouTube, 1:1 for Instagram, 9:16 for TikTok) - Add style keywords like 'professional photography', 'flat illustration', 'minimalist' - Specify what you DON'T want: 'no text, no watermarks' Let me show you some common use cases:

ON SCREEN:

[Create examples for: social media graphic, blog header image, product mockup]

Pro tip: Create a set of brand images in one session. Generate 20-30 images with consistent style, and you'll have content for weeks.

Lesson 2.5: Social Media Content Factory

Duration: 8 min | **Video Type:** Screen Share + Face

ON SCREEN:

ChatGPT + Canva

SCRIPT:

Let's build a system that produces a week of social media content in under an hour. I call this the Content Factory method. Step 1: Generate ideas in bulk

ON SCREEN:

[SHOW: ChatGPT]

Prompt: 'Create 14 social media posts for an AI education brand. 7 for Instagram and 7 for LinkedIn. Mix these types: tips, myths busted, behind-the-scenes, testimonials, questions, how-tos, and motivational. Include the caption, suggested image description, and best posting time.' Step 2: Create the visuals

ON SCREEN:

[SHOW: Open Canva]

Use Canva's batch create feature - create one template, then swap out the text for each post.

ON SCREEN:

[Walk through creating 3-4 posts quickly]

Step 3: Schedule everything Use a free scheduler like Buffer or Later. Upload all your posts and schedule them for the week. The key is batching - create everything in one session instead of scrambling daily. With AI, a week of content takes about 45 minutes.

Lesson 2.6: Content Repurposing - One Piece, Ten Platforms

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

This is my favourite strategy. Create ONE piece of content and turn it into TEN. Here's how: Start with a blog post or a video script. Then use AI to repurpose it.

ON SCREEN:

[SHOW: ChatGPT]

Let's take the blog post we created earlier and repurpose it. Prompt 1: 'Turn this blog post into 5 Twitter/X thread posts' Prompt 2: 'Create an Instagram carousel script - 8 slides with one key point each' Prompt 3: 'Write a LinkedIn article version of this, more professional tone, 500 words' Prompt 4: 'Create an email newsletter from this content, casual tone, with a CTA to read the full blog post' Prompt 5: 'Write a 60-second TikTok/Reel script based on the main point of this post'

ON SCREEN:

[Show each output]

One blog post just became content for 5 platforms. Do this every week and you'll never run out of content. The repurposing formula: Long form content (blog/video) breaks into Medium form (LinkedIn, email) breaks into Short form (social posts, stories, reels) Always create long form first, then break it down. It's much harder to go the other way.

Lesson 2.7: Building a Content Calendar with AI

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Let's put everything together and build a complete content system.

ON SCREEN:

[SHOW: Open Google Sheets or Notion]

I'm going to create a simple content calendar. Columns: Date, Platform, Content Type, Topic, Status, Link. Now let's fill it with AI.

ON SCREEN:

[SHOW: ChatGPT]

Prompt: 'Create a 30-day content calendar for an AI education brand. Platforms: Instagram (daily), LinkedIn (3x/week), Blog (2x/week), Email (1x/week). Themes this month: AI for beginners, productivity tools, success stories. Format as a table with columns: Day, Platform, Type, Topic, Caption Hook.'

ON SCREEN:

[Show filling in the calendar]

Now you have a month planned. Block out 2 hours per week to batch-create content using the techniques from this module. Module 2 complete! You now know how to create unlimited content with AI. In the next module, we'll add voice and video to your toolkit.

MODULE 3

Voice & Video AI Agents

7 Lessons | ~67 minutes total recording time

- 3.1** Introduction to AI Voice Technology (7 min | Talking Head + Screen Share)
- 3.2** Building Your First AI Voice Agent (12 min | Screen Share + Face)
- 3.3** AI Video Creation with D-ID & HeyGen (10 min | Screen Share + Face)
- 3.4** Text-to-Speech - Creating Professional Voiceovers (8 min | Screen Share + Face)
- 3.5** AI Avatars for Business Communication (8 min | Screen Share + Face)
- 3.6** Automating Video Content Production (10 min | Screen Share + Face)
- 3.7** Live Demo - Building a Complete Video Agent (12 min | Screen Share + Face)

Lesson 3.1: Introduction to AI Voice Technology

Duration: 7 min | **Video Type:** Talking Head + Screen Share

SCRIPT:

Welcome to Module 3! This is where things get really exciting. We're going to add voice and video AI to your business. AI voice technology has exploded in 2025. You can now: - Clone your own voice and have AI speak in it - Build phone agents that answer calls 24/7 - Create voiceovers for videos in seconds - Generate audio in 29+ languages The main tools we'll use:

ON SCREEN:

[SHOW each tool's website briefly]

1. ElevenLabs - The gold standard for AI voices. Natural-sounding, emotional, multilingual. 2. Vapi - For building AI phone agents that can answer calls, book appointments, qualify leads. 3. PlayHT - Another great voice option with a free tier. By the end of this module, you'll have built your own AI voice agent. Let's start.

Lesson 3.2: Building Your First AI Voice Agent

Duration: 12 min | **Video Type:** Screen Share + Face

SCRIPT:

Let's build an AI voice agent that can answer phone calls for a business. This is one of the most valuable services you can offer clients.

ON SCREEN:

[SHOW: Open Vapi or similar platform]

Step 1: Create your account

ON SCREEN:

[Walk through sign-up]

Step 2: Set up your first agent Click 'Create New Agent'. Give it a name like 'Business Receptionist'.

Step 3: Write the agent's script This is the system prompt - it tells the AI how to behave. Here's what I use:

ON SCREEN:

[Type the prompt]: 'You are a friendly and professional receptionist for [Business Name]. Your job is to answer calls, provide basic information about the business, and book appointments. Business hours are Monday to Friday 9am to 5pm. Services offered: [list]. Always be polite, speak clearly, and if you don't know an answer, offer to take a message.'

Step 4: Configure the voice Choose a voice that matches the business brand. Test a few options. Step 5: Test it

ON SCREEN:

[Show calling the agent and having a conversation]

This is a service you can charge 200-500 pounds per month for per client. A business that misses phone calls loses money - your AI agent never misses a call.

Lesson 3.3: AI Video Creation with D-ID & HeyGen

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

Now let's create AI videos. These tools let you create videos with AI avatars - realistic digital people who read your scripts on camera.

ON SCREEN:

[SHOW: Open D-ID or HeyGen]

This is perfect for: - Explainer videos without showing your face - Multilingual content (the avatar speaks any language) - Consistent brand videos - Social media content at scale Let me create one right now. Step 1: Choose an avatar

ON SCREEN:

[Browse available avatars, select one]

Step 2: Write a script

ON SCREEN:

[Type a short script for a business introduction video]

Step 3: Select voice and language

ON SCREEN:

[Choose settings]

Step 4: Generate

ON SCREEN:

[Show the video being created]

[Play the result]

That took about 2 minutes. A human video production would take hours and cost hundreds. You can use these for: - Business introduction videos for clients - Product explainer videos - Training and onboarding videos - Social media content - Course content supplements

Lesson 3.4: Text-to-Speech - Creating Professional Voiceovers

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Voiceovers are expensive if you hire humans. With AI, they're free or very cheap.

ON SCREEN:

[SHOW: Open ElevenLabs]

Let me show you how to create a professional voiceover. Step 1: Type or paste your script

ON SCREEN:

[Paste a script for a promotional video]

Step 2: Choose a voice

ON SCREEN:

[Browse voices, preview a few]

Step 3: Adjust settings - Stability: Higher for consistent, lower for more emotional - Clarity: Keep high for professional content - Speed: Adjust to taste Step 4: Generate and download

ON SCREEN:

[Generate the voiceover, play it]

That sounds professional enough for any business. Advanced tip: You can clone your own voice! ElevenLabs lets you upload samples of your voice and create a clone. This means AI can speak in YOUR voice. Perfect for scaling content creation.

ON SCREEN:

[Show the voice cloning feature if available]

Lesson 3.5: AI Avatars for Business Communication

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Let's explore how businesses use AI avatars for everyday communication. Use cases: 1. Welcome videos on websites 2. Product demonstrations 3. Customer support video responses 4. Internal training materials 5. Personalised video messages at scale

ON SCREEN:

[SHOW: Create a website welcome video with D-ID/HeyGen]

Script for the demo: 'Welcome to our website! I'm here to help you find exactly what you need. We specialise in AI solutions for small businesses. Browse our services or chat with us to get started.'

ON SCREEN:

[Generate and show result]

Now imagine sending personalised video messages to leads. Instead of a generic email, they get a video with their name mentioned. That's the power of AI video at scale.

Lesson 3.6: Automating Video Content Production

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

Let's build a system that produces videos automatically. The workflow: 1. AI writes the script (ChatGPT/Claude) 2. AI generates the voiceover (ElevenLabs) 3. AI creates the video (D-ID/HeyGen) 4. You or AI edits and publishes

ON SCREEN:

[SHOW: Walk through the complete workflow]

Step 1: Generate 5 video scripts with ChatGPT

ON SCREEN:

[Demo]

Step 2: Create voiceovers in batch with ElevenLabs

ON SCREEN:

[Demo]

Step 3: Generate videos with D-ID

ON SCREEN:

[Demo]

In Module 4, we'll automate this entire process with Make.com so it happens without you.

Lesson 3.7: Live Demo - Building a Complete Video Agent

Duration: 12 min | **Video Type:** Screen Share + Face

SCRIPT:

Let's put everything together. I'm going to build a complete AI video agent from scratch in real time. The project: Create an AI receptionist video for a fictional hair salon called 'Glow Studio'.

ON SCREEN:

[Walk through the entire process:

1. Use ChatGPT to write the script 2. Generate the voiceover with ElevenLabs 3. Create the avatar video with D-ID 4. Show the final result Explain each step as you go] This is a service package you could offer to local businesses for 300-500 pounds. The cost to produce it is nearly zero. Congratulations on completing Module 3! You now have voice and video AI skills that most people don't even know exist.

MODULE 4

No-Code Automation

6 Lessons | ~55 minutes total recording time

- 4.1** Introduction to No-Code AI Tools (7 min | Screen Share + Face)
- 4.2** Building Workflows with Make (10 min | Screen Share + Face)
- 4.3** Zapier AI Automation Masterclass (10 min | Screen Share + Face)
- 4.4** Connecting AI Tools - APIs Made Simple (10 min | Screen Share + Face)
- 4.5** Building AI Chatbots Without Code (10 min | Screen Share + Face)
- 4.6** Automation Templates You Can Use Today (8 min | Screen Share + Face)

Lesson 4.1: Introduction to No-Code AI Tools

Duration: 7 min | **Video Type:** Screen Share + Face

SCRIPT:

Welcome to Module 4! This module is about working smarter, not harder. We're going to automate your AI workflows so they run without you. No-code means you don't need to write any programming code. Everything is drag-and-drop and visual. The two tools we'll master: 1. Make.com (formerly Integromat) - More powerful, more flexible 2. Zapier - Simpler, great for basic automations Think of these as the glue between your AI tools. They connect everything together. Example automations we'll build: - New lead comes in via form, AI qualifies them, sends personalised email - Blog post is published, AI creates social media posts, schedules them automatically - Customer asks a question, AI generates response, sends it via email - New order comes in, AI creates a thank you video, sends it to the customer By the end of this module, you'll have at least 3 automations running for your business.

Lesson 4.2: Building Workflows with Make

Duration: 10 min | **Video Type:** Screen Share + Face

ON SCREEN:

Make.com dashboard

SCRIPT:

Let's build our first automation in Make.com.

ON SCREEN:

[SHOW: Open Make.com and log in]

The interface: Make uses a visual workflow builder. Each circle is a 'module' - it does one action. You connect modules together to create a workflow. Our first automation: When someone fills out a contact form, AI writes a personalised response and sends it via email.

ON SCREEN:

[Build the automation step by step:

1. Trigger: Webhook or form submission 2. ChatGPT module: Generate personalised response 3. Email module: Send the response Test it live] See? Three steps. No code. This runs automatically 24/7.

Lesson 4.3: Zapier AI Automation Masterclass

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

Now let's look at Zapier. It's simpler than Make but perfect for straightforward automations.

ON SCREEN:

[SHOW: Open Zapier]

Zapier calls their automations 'Zaps'. Each Zap has a trigger and one or more actions. Let's build: When a new email arrives with 'invoice' in the subject, AI summarises it and adds to a Google Sheet.

ON SCREEN:

[Build step by step]

Zapier vs Make: Use Zapier for simple 2-3 step automations. Use Make for complex workflows with conditions, loops, and multiple branches.

Lesson 4.4: Connecting AI Tools - APIs Made Simple

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

APIs might sound scary but they're actually simple. An API is just a way for two tools to talk to each other. Think of it like ordering at a restaurant. You (the app) tell the waiter (the API) what you want, the kitchen (the other app) makes it, and the waiter brings it back. In Make.com and Zapier, the API connections are already built in. But sometimes you need to connect a tool manually.

ON SCREEN:

[SHOW: How to use an API key]

1. Go to the tool's settings 2. Find 'API Key' or 'Developer Settings' 3. Copy the key 4. Paste it into Make.com's HTTP module

ON SCREEN:

[Demo connecting a custom API - keep it simple]

The key thing to remember: APIs are just connections between tools. Make and Zapier handle the technical bits for you.

Lesson 4.5: Building AI Chatbots Without Code

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

Chatbots are one of the most in-demand AI services. Let's build one without writing any code.

ON SCREEN:

[SHOW: Use a no-code chatbot builder like Chatbase, Botpress, or similar]

Step 1: Create a new chatbot Step 2: Train it on your data (upload documents, paste website URL)
Step 3: Customise the responses Step 4: Embed on your website

ON SCREEN:

[Build a complete chatbot for a fictional business]

This is a service you can offer clients for 200-400 pounds per month. The chatbot handles customer questions 24/7, reduces support tickets, and even qualifies leads.

Lesson 4.6: Automation Templates You Can Use Today

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Let me give you 5 ready-made automation templates you can set up today. Template 1: Lead Nurture Sequence Trigger: New contact form submission Action: AI writes 3 follow-up emails, scheduled 1, 3, and 7 days apart Template 2: Social Media Auto-Poster Trigger: New blog post published Action: AI creates Instagram, LinkedIn, and Twitter posts, schedules them Template 3: Review Responder Trigger: New Google review Action: AI writes personalised thank you response Template 4: Invoice Tracker Trigger: Email with attachment Action: AI reads invoice, extracts amount and due date, adds to spreadsheet Template 5: Content Creator Trigger: Weekly schedule Action: AI generates 7 social media posts, creates images, saves to folder

ON SCREEN:

[Walk through setting up at least 2 of these]

These automations save hours every week. Once they're set up, they just run.

MODULE 5

AI SEO & Marketing

7 Lessons | ~62 minutes total recording time

- 5.1** AI SEO Fundamentals (8 min | Screen Share + Face)
- 5.2** Keyword Research with AI Tools (10 min | Screen Share + Face)
- 5.3** AI-Powered Content Optimisation (10 min | Screen Share + Face)
- 5.4** Local SEO & Google Business AI (8 min | Screen Share + Face)
- 5.5** AI Email Marketing Automation (10 min | Screen Share + Face)
- 5.6** Paid Advertising with AI (8 min | Screen Share + Face)
- 5.7** Building Your AI Marketing Stack (8 min | Screen Share + Face)

Lesson 5.1: AI SEO Fundamentals

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Welcome to Module 5! SEO - Search Engine Optimisation - is how you get found on Google. And with AI, it's easier than ever. SEO basics in 60 seconds: People search on Google. Google shows results. If your content is on page 1, you get free traffic. If it's on page 2, nobody sees it. The three pillars of SEO: 1. Content - What you write (AI handles this) 2. Technical - How your site is built (plugins handle this) 3. Authority - Who links to you (outreach handles this) AI supercharges pillar 1 and helps with pillar 3. In this module, we'll use AI to: - Find keywords people are searching for - Write optimised articles that rank - Optimise existing content - Build a local SEO presence The goal: Get your business appearing on Google for free, bringing you leads while you sleep.

Lesson 5.2: Keyword Research with AI Tools

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

Keywords are the foundation of SEO. Let me show you how to find profitable keywords with AI.

ON SCREEN:

[SHOW: Open ChatGPT + a free keyword tool like Ubersuggest or Google Keyword Planner]

Step 1: Brainstorm seed keywords with AI Prompt: 'I run a business that offers AI consulting to small businesses in the UK. Give me 20 keywords that potential clients might search for on Google. Include a mix of informational keywords (how to...) and commercial keywords (best..., hire...).' Step 2: Validate with a keyword tool

ON SCREEN:

[Show checking search volume and competition]

Step 3: Prioritise Look for keywords with decent search volume but low competition. These are your quick wins. Step 4: Create a keyword map Assign each keyword to a page or blog post on your site.

ON SCREEN:

[Walk through the complete process]

Do this once a month and you'll never run out of content ideas that actually bring traffic.

Lesson 5.3: AI-Powered Content Optimisation

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

Writing content is one thing. Optimising it to rank on Google is another. Let me show you the AI optimisation process.

ON SCREEN:

[SHOW: Open an existing blog post + ChatGPT]

The optimisation checklist: 1. Title tag - Include your keyword, make it clickable 2. Meta description - AI writes a compelling 155-character summary 3. Headings - Use H2s and H3s with keyword variations 4. Content depth - AI can expand thin content with more detail 5. Internal links - Link to your other pages 6. Image alt text - Describe images for SEO

ON SCREEN:

[Walk through optimising a real blog post with AI assistance]

Prompt for optimisation: 'Analyse this blog post for SEO. The target keyword is [keyword]. Suggest improvements for the title, meta description, headings, content gaps, and internal linking opportunities.'

Lesson 5.4: Local SEO & Google Business AI

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

If you serve local customers, Local SEO is a goldmine. Let me show you how to dominate local search with AI.

ON SCREEN:

[SHOW: Google Business Profile]

Step 1: Set up or optimise your Google Business Profile Step 2: Use AI to write your business description with keywords Step 3: Use AI to respond to every review (we automated this in Module 4!) Step 4: Create local content targeting your area

ON SCREEN:

[Demo each step]

Prompt: 'Write a Google Business Profile description for an AI consulting firm in Manchester. Include services: chatbot development, automation, content creation. Use local keywords naturally.'

Lesson 5.5: AI Email Marketing Automation

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

Email is still the highest ROI marketing channel. AI makes it effortless.

ON SCREEN:

[SHOW: Email platform like Mailchimp or similar]

We'll build a complete email sequence: 1. Welcome email - sent immediately when someone signs up 2. Value email - sent day 2, teaching something useful 3. Story email - sent day 4, sharing a success story 4. Offer email - sent day 7, presenting your product

ON SCREEN:

[Use AI to write each email, show the process]

Prompt: 'Write a 4-email welcome sequence for a new subscriber to an AI education newsletter. Tone: friendly, helpful. Goal: build trust and eventually promote a 97 pound course. Email 1: Welcome and deliver lead magnet. Email 2: Share a quick AI win they can try today. Email 3: Tell a success story. Email 4: Soft pitch for the course.'

Lesson 5.6: Paid Advertising with AI

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

While SEO is free traffic, paid ads give you instant results. AI can write and optimise your ads.

ON SCREEN:

[SHOW: Google Ads or Facebook Ads interface]

How to use AI for ads: 1. Write ad copy variations - Generate 10 headlines and 5 descriptions, test them 2. Create ad images - Use Leonardo AI for eye-catching visuals 3. Build landing pages - AI writes the copy, you design in Canva or a builder

ON SCREEN:

[Demo: Create a complete Facebook ad with AI]

Prompt: 'Write 5 Facebook ad variations promoting a beginner AI course at 97 pounds. Target audience: UK business owners aged 25-55. Include headline, primary text, description, and CTA. Each variation should take a different angle: curiosity, urgency, social proof, transformation, fear of missing out.'

Lesson 5.7: Building Your AI Marketing Stack

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Let's put your complete marketing system together. The AI Marketing Stack: - Content creation: ChatGPT/Claude + Leonardo AI - SEO: AI-optimised blog posts + keyword research - Email: Automated sequences written by AI - Social: AI-generated posts + scheduled automatically - Ads: AI-written copy + AI-generated images - Automation: Make.com connecting everything

ON SCREEN:

[Show a diagram or flowchart of how everything connects]

This entire system can run with 2-3 hours of work per week. The AI does the heavy lifting, you provide the strategy and oversight.

MODULE 6

AI Sales & Leads

6 Lessons | ~52 minutes total recording time

- 6.1** AI Lead Generation Strategies (8 min | Screen Share + Face)
- 6.2** Building AI Sales Funnels (10 min | Screen Share + Face)
- 6.3** AI Cold Email & Outreach (10 min | Screen Share + Face)
- 6.4** CRM Automation with AI (8 min | Screen Share + Face)
- 6.5** AI Sales Coaching & Call Analysis (8 min | Screen Share + Face)
- 6.6** Closing Deals with AI Assistance (8 min | Screen Share + Face)

Lesson 6.1: AI Lead Generation Strategies

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Welcome to Module 6! Making content is great, but you need to convert that attention into sales. Let's talk lead generation with AI. Five AI-powered lead gen strategies: 1. AI Lead Magnets - We built one in Module 1. Create multiple for different audiences. 2. AI Chatbot Qualification - Your website chatbot asks qualifying questions before you get on a call. 3. AI Cold Outreach - Personalised emails at scale (we'll cover this in detail). 4. AI Social Selling - Automated engagement and DM sequences. 5. AI Referral Systems - Automated referral tracking and rewards. Each of these can be set up in a day and generates leads on autopilot. Let's start with the most powerful one.

Lesson 6.2: Building AI Sales Funnels

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

A sales funnel is the journey from stranger to customer. AI can build and optimise every step. The Classic Funnel: Ad or Content > Landing Page > Lead Magnet > Email Sequence > Sales Page > Checkout Let's build each piece with AI.

ON SCREEN:

[SHOW: Walk through creating each funnel element with AI assistance]

Landing page copy, email sequence, sales page - all written by AI, refined by you.

Lesson 6.3: AI Cold Email & Outreach

Duration: 10 min | **Video Type:** Screen Share + Face

SCRIPT:

Cold email works when it's personalised. AI makes personalisation at scale possible.

ON SCREEN:

[SHOW: Email tool]

The personalised cold email formula: 1. Compliment something specific about their business 2. Identify a problem you can solve 3. Brief mention of how you solve it 4. Clear call to action AI prompt: 'Write a cold email to the owner of a local estate agency. Personalisation: mention their website and one specific thing you noticed. Offer: AI chatbot for their website that can answer property questions 24/7.

CTA: Book a 15-minute demo call.'

ON SCREEN:

[Show variations, A/B testing concepts]

Key rules: - Keep emails under 150 words - One clear CTA - Follow up 3 times (AI writes all follow-ups)
- Track open rates and replies

Lesson 6.4: CRM Automation with AI

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

A CRM (Customer Relationship Management) system tracks your leads and customers. With AI, it becomes intelligent.

ON SCREEN:

[SHOW: Free CRM like HubSpot or similar]

AI + CRM automations: 1. Auto-tag leads based on behaviour 2. AI-written follow-up emails triggered by actions 3. Lead scoring - AI ranks leads by purchase likelihood 4. Meeting notes summarised by AI 5. Deal stage automation

ON SCREEN:

[Demo setting up 2-3 automations]

Lesson 6.5: AI Sales Coaching & Call Analysis

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

AI can analyse your sales calls and tell you exactly how to improve.

ON SCREEN:

[SHOW: Tools like Fireflies, Otter.ai, or similar]

How it works: 1. Record your sales call (with permission) 2. AI transcribes it 3. AI analyses: talk-to-listen ratio, objection handling, enthusiasm, key moments

ON SCREEN:

[Show an example analysis]

You can also use AI to prepare for calls: Prompt: 'I have a sales call with a dentist who needs help with online marketing. Prepare me 10 discovery questions, 3 common objections with responses, and a recommended pricing structure.'

Lesson 6.6: Closing Deals with AI Assistance

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

The close is where most people struggle. AI can help you handle objections and close confidently. Common objections and AI-crafted responses: 'It's too expensive' - Show the ROI and cost of NOT using AI 'I need to think about it' - Offer a time-limited bonus or trial 'I'm already using something else' - Highlight your unique differentiators 'Can you send me more information?' - Share a case study and book the next call

ON SCREEN:

[SHOW: Use ChatGPT to roleplay a sales conversation]

Prompt: 'Act as a sceptical business owner. I'm going to pitch you my AI services. Push back with common objections so I can practice handling them.' This is incredible practice before real sales calls.

MODULE 7

White-Label AI SaaS

6 Lessons | ~52 minutes total recording time

- 7.1 Introduction to White-Label AI (8 min | Talking Head + Screen Share)
- 7.2 Setting Up Your AI SaaS Product (12 min | Screen Share + Face)
- 7.3 Pricing & Packaging AI Services (8 min | Screen Share + Face)
- 7.4 Client Onboarding Automation (8 min | Screen Share + Face)
- 7.5 Building Your AI Agency Brand (8 min | Screen Share + Face)
- 7.6 Scaling Your AI Agency (8 min | Screen Share + Face)

Lesson 7.1: Introduction to White-Label AI

Duration: 8 min | **Video Type:** Talking Head + Screen Share

SCRIPT:

Welcome to Module 7! This is where we go from freelancer to business owner. White-labelling means taking someone else's AI product, putting your brand on it, and selling it as your own. It's like a supermarket's own-brand products - they don't make the food, they just put their label on it. With AI SaaS, you can offer: - AI chatbots under your brand - AI marketing tools under your brand - AI voice agents under your brand Your clients pay you monthly. You pay the platform a fraction of that. The difference is your profit. This is recurring revenue - clients pay you every single month.

Lesson 7.2: Setting Up Your AI SaaS Product

Duration: 12 min | **Video Type:** Screen Share + Face

SCRIPT:

Let's set up your first white-label AI product.

ON SCREEN:

[SHOW: Platform like GoHighLevel, Vendasta, or similar AI white-label platform]

Step 1: Choose your platform and sign up Step 2: Customise with your branding (logo, colours, domain) Step 3: Configure the AI features Step 4: Set up pricing plans Step 5: Create your sales page

ON SCREEN:

[Walk through each step in detail]

Lesson 7.3: Pricing & Packaging AI Services

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Pricing can make or break your business. Here's how to price AI services. The three pricing models: 1. Project-based: 500-5000 pounds one-time (chatbot build, automation setup) 2. Monthly retainer: 200-2000 pounds per month (ongoing management, support) 3. SaaS subscription: 50-500 pounds per month (white-label platform access) The sweet spot for beginners: Start with a setup fee + monthly retainer. Example: 500 pounds setup + 297 pounds per month for AI chatbot + marketing automation.

ON SCREEN:

[Show pricing calculator and package examples]

Always sell outcomes, not tools. Don't say 'You get an AI chatbot.' Say 'You'll never miss a customer inquiry again - even at 3am.'

Lesson 7.4: Client Onboarding Automation

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

A smooth onboarding experience keeps clients happy and reduces your workload. The automated onboarding sequence: 1. Welcome email with login details (automated) 2. Onboarding questionnaire (AI-powered form) 3. Account setup (automated from questionnaire answers) 4. Training videos (pre-recorded, sent automatically) 5. Check-in call at day 7 (scheduled automatically)

ON SCREEN:

[SHOW: Build this sequence in Make.com]

Lesson 7.5: Building Your AI Agency Brand

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Your brand is how clients perceive you. Let's build a professional AI agency brand with AI.

ON SCREEN:

[SHOW: Use AI tools to create:]

1. Agency name (ChatGPT brainstorm) 2. Logo (Leonardo AI or Canva) 3. Website copy (Claude AI) 4. Case study templates (ChatGPT) 5. Proposal templates (ChatGPT)

ON SCREEN:

[Walk through creating each asset]

Lesson 7.6: Scaling Your AI Agency

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Once you have 3-5 clients, it's time to scale. Scaling strategies: 1. Productise your services - Turn custom work into repeatable packages 2. Hire virtual assistants - Train them to handle delivery 3. Use AI for more - Automate client reporting, content creation, support 4. Build partnerships - Collaborate with web designers, marketers, agencies 5. Create case studies - Every happy client becomes marketing material The path: - 0-3 clients: Do everything yourself - 3-10 clients: Systemise with AI automation - 10-20 clients: Hire help - 20+ clients: You're running an agency It's absolutely possible to reach 10,000 pounds per month within 6-12 months.

MODULE 8

Ethics, Legal & Scaling

5 Lessons | ~44 minutes total recording time

- 8.1** AI Ethics & Responsible Use (8 min | Talking Head + Slides)
- 8.2** Legal Considerations for AI Businesses (8 min | Screen Share + Face)
- 8.3** Data Privacy & GDPR Compliance (8 min | Screen Share + Face)
- 8.4** Scaling Your AI Business (10 min | Talking Head + Screen Share)
- 8.5** Your AI Business Launch Plan (10 min | Talking Head)

Lesson 8.1: AI Ethics & Responsible Use

Duration: 8 min | **Video Type:** Talking Head + Slides

SCRIPT:

Welcome to our final module. Before you launch your AI business, let's talk about doing it right. AI ethics matter because: - Your reputation depends on it - Regulations are coming and you want to be ahead - It's simply the right thing to do Key principles: 1. Transparency - Tell clients and customers when AI is being used 2. Accuracy - Always review AI output before sending or publishing 3. Privacy - Never feed personal customer data into public AI tools 4. Fairness - Be aware of AI bias and check outputs for fairness 5. Honesty - Don't claim AI work is human-created

ON SCREEN:

[Discuss real examples of each]

The businesses that thrive long-term are the ethical ones.

Lesson 8.2: Legal Considerations for AI Businesses

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

Let's cover the legal basics. I'm not a lawyer, so always get professional advice for your specific situation. Key legal areas: 1. Terms of Service - What AI tools allow you to do with their output 2. Copyright - AI-generated content and who owns it 3. Liability - Who's responsible when AI makes a mistake 4. Contracts - What to include in client agreements 5. Disclosure - When you must tell people AI was used

ON SCREEN:

[Show examples of each, provide template resources]

AI prompt for legal: 'Draft a basic terms of service for an AI consulting business that uses AI tools to create content and chatbots for clients. Include sections on: ownership of deliverables, liability limitations, AI disclosure, revision policy, and payment terms. Note: this is a starting template to be reviewed by a qualified solicitor.'

Lesson 8.3: Data Privacy & GDPR Compliance

Duration: 8 min | **Video Type:** Screen Share + Face

SCRIPT:

If you handle customer data in the UK or EU, GDPR applies to you. Here's what you need to know. The basics: 1. Get consent before collecting data 2. Only collect what you need 3. Store it securely 4. Delete it when asked 5. Don't send it outside the EU without safeguards AI-specific GDPR concerns: - Don't paste customer personal data into ChatGPT - Use enterprise versions of AI tools that don't train on your data - Include AI usage in your privacy policy - Get consent for AI voice recordings

ON SCREEN:

[Show how to add appropriate disclosures to a website]

Prompt: 'Write a GDPR-compliant privacy policy section about AI tool usage for a UK business that uses AI chatbots and automated email marketing.'

Lesson 8.4: Scaling Your AI Business

Duration: 10 min | **Video Type:** Talking Head + Screen Share

SCRIPT:

You've learned the tools. You've learned the strategies. Now let's build your growth plan. The 90-Day Launch Plan: Days 1-30: Foundation - Set up all your AI tools (Module 1) - Create your first lead magnet (Module 1) - Build your content system (Module 2) - Start posting daily on social media Days 31-60: Activation - Launch your AI service offering (Module 7) - Set up automations (Module 4) - Start cold outreach (Module 6) - Get your first 1-3 clients Days 61-90: Growth - Optimise what's working - Add SEO for long-term traffic (Module 5) - Build case studies from early clients - Start scaling with systems

ON SCREEN:

[Walk through each phase in detail]

The most important thing: START. Imperfect action beats perfect planning every time.

Lesson 8.5: Your AI Business Launch Plan

Duration: 10 min | **Video Type:** Talking Head

SCRIPT:

This is it - our final lesson. Congratulations on making it through all 8 modules! Let me recap what you've learned: - Module 1: AI fundamentals and your toolkit - Module 2: Content creation mastery - Module 3: Voice and video AI agents - Module 4: No-code automation - Module 5: AI SEO and marketing - Module 6: AI sales and lead generation - Module 7: White-label AI SaaS - Module 8: Ethics, legal, and scaling You now have skills that 99% of business owners don't have. That's your competitive advantage. My challenge to you: 1. This week: Create your first AI service package 2. This month: Get your first paying client 3. In 90 days: Hit 1000 pounds per month in recurring revenue It's completely achievable. I've seen students in this course do it faster. Your next steps: 1. Go to the

certificate page and download your certificate of completion 2. Join our community to connect with other graduates 3. If you're on the Business MRR tier, go to your reseller dashboard and start sharing your referral link Thank you for being part of WavesAI Academy. Now go build something amazing! Remember: The best time to start an AI business was yesterday. The second best time is today.
