

MODULE 1

AI Fundamentals & Claude AI

Your foundation in artificial intelligence - understand the technology, master the tools, and take your first step into the AI revolution.

"The secret of getting ahead is getting started."

-- Mark Twain

LESSONS IN THIS MODULE:

1. Welcome to WavesAI Academy
2. What is AI? (No Jargon Version)
3. The AI Business Landscape in 2025
4. Setting Up Your AI Toolkit
5. Your First AI Win: Build a Lead Magnet in 30 Minutes
6. Module 1 Quiz & Action Plan

WavesAI Academy | Master AI Agents & Automation

Learning Objectives

By the end of Module 1, you will be able to:

- Understand the course structure and what you will learn across all 8 modules
- Set up your learning environment and access all course resources
- Explain AI, machine learning, and large language models in simple terms
- Understand how AI generates text, images, audio, and video
- Identify the biggest AI business opportunities right now
- Understand which AI services businesses are willing to pay for
- Create accounts on all essential AI platforms
- Understand the free and paid tiers of each tool
- Use Claude AI to create a professional lead magnet from scratch
- Experience the speed and quality of AI-assisted content creation
- Review and consolidate everything learned in Module 1
- Create your personal action plan for the next 7 days

Lesson 1: Welcome to WavesAI Academy

What This Course Will Teach You

Welcome to WavesAI Academy. Over the next 8 modules, you will learn everything you need to build a profitable AI-powered business from scratch. This is not just theory - every lesson includes hands-on practice with real AI tools.

By the end of this course, you will be able to offer AI services to businesses, build your own AI agents, create content at scale, automate workflows, and generate recurring revenue. Whether you want to freelance, start an agency, or add AI to your existing business, this course has you covered.

Course Structure Overview

- Module 1: AI Fundamentals & Claude AI - understand the technology and tools
- Module 2: Content Creation Mastery - create professional content with AI
- Module 3: Voice & Video AI Agents - build voice agents and video content
- Module 4: No-Code AI Automation - connect AI to business workflows
- Module 5: AI SEO & Marketing - drive traffic and leads with AI
- Module 6: AI Sales & Lead Generation - convert leads into paying clients
- Module 7: White-Label AI SaaS - build recurring revenue with AI products
- Module 8: Ethics, Legal & Scaling - grow responsibly and scale your business

What You Will Build

Throughout this course, you will build two real AI agents that you can use in your business or sell to clients:

- Customer Service AI Agent (Module 3-4) - a chatbot that handles FAQs, captures leads, and provides 24/7 support. Businesses pay 500-2,000 GBP for this.
- Social Media Management Agent (Module 7) - an agent that creates, schedules, and manages social media content. Offer as a monthly retainer of 300-800 GBP.

Your Learning Environment

You will need access to the following tools (all covered in the course):

- Claude AI (claude.ai) - your primary AI assistant for strategy, writing, and agent building

- WavesAI Studio (wavesaistudio.com) - for image generation, voice synthesis, and video creation
- WavesAI Systems (wavesaisystems.com) - for CRM, automation, and business management
- A web browser and internet connection
- A notepad or document for taking notes

Pro Tip: Bookmark all the tool links above. You will use them throughout every module.

Lesson 2: What is AI? (No Jargon Version)

AI in Plain English

Artificial Intelligence is software that can learn patterns from data and use those patterns to make decisions or create new content. Think of it like this: if you showed someone 10 million photographs of cats, they would get very good at recognising cats. AI works the same way, but with text, images, audio, and video.

When you type a question into Claude AI or ChatGPT, you are using a Large Language Model (LLM). These models have been trained on billions of pages of text from the internet - books, articles, websites, code. They learned the patterns of language so well that they can generate new text that sounds human.

Key Terms You Need to Know

Artificial Intelligence (AI)

Software that can perform tasks that normally require human intelligence - understanding language, recognising images, making decisions.

Machine Learning (ML)

A type of AI that learns from data rather than being explicitly programmed. It improves with more data.

Large Language Model (LLM)

An AI model trained on massive amounts of text. Examples: Claude, GPT-4, Gemini. These power chatbots and content generators.

Prompt

The instruction or question you give to an AI. Better prompts = better results. We cover this in depth in Lesson 3.

Token

The unit of text that AI processes. Roughly 1 token = 0.75 words. Models have token limits that determine how much text they can process at once.

Generative AI

AI that creates new content - text, images, music, video, code. This is the type of AI you will use throughout this course.

Types of AI You Will Use

- Text AI - Claude, ChatGPT (writing, strategy, coding, analysis)
- Image AI - Leonardo AI, DALL-E, Midjourney (graphics, photos, designs)

- Voice AI - ElevenLabs, Vapi (voiceovers, phone agents, podcasts)
- Video AI - HeyGen, D-ID, Runway (talking avatars, video ads, editing)
- Automation AI - Make.com, Zapier, n8n (connecting tools, workflows)

Pro Tip: You do not need to understand the maths or code behind AI. You just need to know how to use the tools effectively. That is exactly what this course teaches.

PRACTICE EXERCISE

Go to claude.ai and create a free account. Ask Claude: "Explain what you are and how you work in 3 simple sentences." Notice how it responds - this is a Large Language Model in action.

Lesson 3: The AI Business Landscape in 2025

The Opportunity is Now

The AI industry is worth over 200 billion dollars and growing exponentially. But here is the key insight: most businesses know they need AI but have no idea how to implement it. That gap between awareness and implementation is your opportunity.

40% of businesses risk falling behind if they do not adopt AI within the next 5 years. Companies using AI agents are growing 3x faster than those who do not. This creates massive demand for people who can set up and manage AI systems for businesses.

AI Services Businesses Will Pay For

- AI Customer Service Agents (500-2,000 GBP per setup) - chatbots that handle FAQs, bookings, and support 24/7
- AI Content Creation (300-1,500 GBP/month retainer) - blog posts, social media, email campaigns
- AI Voice Agents (1,000-3,000 GBP per setup) - phone answering, appointment booking, lead qualification
- AI Lead Generation (500-2,000 GBP/month) - finding and qualifying potential customers automatically
- AI Automation (500-5,000 GBP per project) - connecting business tools, eliminating manual tasks
- AI SEO (300-1,000 GBP/month) - daily content publishing, keyword research, ranking optimisation
- AI Video Content (200-1,000 GBP per video) - talking head videos, ads, social media clips
- White-Label AI Products (recurring revenue) - offering AI tools under your own brand

Your Path to Profit

You do not need to pick just one service. Many successful AI professionals offer a bundle - for example, setting up a customer service agent plus content automation for a monthly retainer. The key is to start with one service, get good at it, then expand.

Pro Tip: Start by thinking about which service excites you most. By Module 6, you will have a complete client acquisition strategy for your chosen AI service.

PRACTICE EXERCISE

List 5 local businesses (restaurants, salons, gyms, estate agents, accountants) that you think could benefit from an AI chatbot or content automation. You will use this list later in Module 6 when we cover client acquisition.

Lesson 4: Setting Up Your AI Toolkit

Your Essential AI Stack

Here is every tool you will use in this course, organised by purpose. Create accounts on each one now so you are ready for the hands-on lessons.

1. Claude AI (Primary AI Assistant)

- Website: claude.ai
- What it does: Text generation, strategy, coding, analysis, agent building
- Free tier: Yes (limited messages per day)
- Pro plan: \$20/month (recommended once earning)
- Why Claude over ChatGPT: Better reasoning, more reliable outputs, ideal for building AI agents

2. WavesAI Studio (Creative Suite)

- Website: wavesaistudio.com
- What it does: Image generation, text-to-speech, sound effects, video creation
- Included with your course enrolment
- Credits system - use for hands-on practice throughout the course

3. WavesAI Systems (Business Platform)

- Website: wavesaisystems.com
- What it does: CRM, pipelines, email campaigns, automation, website builder
- Covered in Modules 4, 6, and 8
- All-in-one platform for running your AI business

4. Make.com (Automation)

- Website: make.com
- What it does: Connects apps and automates workflows (no coding required)
- Free tier: 1,000 operations/month
- Used in Module 4 for building automated workflows

5. Additional Tools (Covered Later)

- ElevenLabs (elevenlabs.io) - voice cloning, text-to-speech (Module 3)
- HeyGen (heygen.com) - AI video avatars (Module 3)
- Leonardo AI (leonardo.ai) - advanced image generation (Module 2)
- Vapi (vapi.ai) - AI phone agents (Module 3)
- Canva (canva.com) - design and branding (Module 2)

Pro Tip: Do not pay for any tool yet. Start with free tiers. Once you land your first client, reinvest that money into upgrading the tools you use most.

PRACTICE EXERCISE

Create accounts on claude.ai, wavesaistudio.com, wavesaisystems.com, and make.com. Spend 10 minutes exploring each one. Write down one thing that impressed you about each tool.

Lesson 5: Your First AI Win: Build a Lead Magnet in 30 Minutes

What is a Lead Magnet?

A lead magnet is a free resource you offer in exchange for someone's email address. It could be a PDF guide, checklist, template, or report. Businesses use lead magnets to build their email list and nurture potential customers.

In this lesson, you will create a professional lead magnet using Claude AI in under 30 minutes. This is the kind of deliverable you can charge clients 200-500 GBP to create.

Step-by-Step: Creating Your Lead Magnet

Step 1: Choose a niche. For this exercise, let's use "local restaurant marketing." You can adapt this to any industry later.

Step 2: Open Claude AI (claude.ai) and paste this prompt: "Create a comprehensive PDF guide titled '7 Ways AI Can Double Your Restaurant's Revenue in 90 Days.' Include an introduction, 7 detailed strategies with specific examples, action steps for each strategy, and a conclusion with a call to action. Write it in a friendly, professional tone. Format it with clear headings and bullet points."

Step 3: Review Claude's output. Notice how it creates structured, professional content in seconds. Edit anything you want to personalise.

Step 4: Open Canva (canva.com) and search for "ebook template" or "lead magnet template." Choose a clean, professional design.

Step 5: Copy Claude's content into the Canva template. Add your branding (logo, colours, contact details).

Step 6: Export as PDF. You now have a professional lead magnet.

Why This Matters

You just created in 30 minutes what would take a copywriter 4-8 hours. This is the power of AI. Now imagine doing this for clients at 300 GBP each - that is 300 GBP per hour effectively. And as you get faster, you can create multiple per day.

Pro Tip: Save your lead magnet prompt as a template. You can reuse it for any industry by changing the niche and topic. Build a library of prompts for different services.

PRACTICE EXERCISE

Create a lead magnet for a business niche you are interested in (fitness, real estate, beauty, coaching - anything). Use the prompt template above but adapt it to your chosen niche. Save the finished PDF - this is the first piece of your portfolio.

Lesson 6: Module 1 Quiz & Action Plan

Module 1 Review Questions

Test your understanding of the fundamentals. Write down your answers before checking:

- 1. What is a Large Language Model and how does it work in simple terms?
- 2. Name 3 AI services that businesses are willing to pay for.
- 3. What is the difference between Claude AI and ChatGPT? Which is better for building agents?
- 4. What is a prompt and why does prompt quality matter?
- 5. Name 5 tools in your AI toolkit and what each one does.
- 6. What is a lead magnet and how can you create one with AI?
- 7. What is a token in AI terminology?
- 8. Why is the gap between AI awareness and implementation an opportunity for you?

Your 7-Day Action Plan

Before moving to Module 2, complete these tasks:

Step 1: Day 1-2: Create accounts on all tools listed in Lesson 4. Explore each one for at least 15 minutes.

Step 2: Day 3-4: Create 3 lead magnets for 3 different business niches using Claude AI.

Step 3: Day 5: Research 10 local businesses that could benefit from AI services. Save their contact details.

Step 4: Day 6: Ask Claude AI 20 different questions about business and marketing. Notice how it handles different topics.

Step 5: Day 7: Write a one-page summary of what you have learned in Module 1 and what excites you most about AI.

Pro Tip: Do not skip the action plan. The students who succeed are the ones who practice consistently. Module 2 builds directly on what you learn here.

Module Summary

Key Takeaways:

- **Welcome to WavesAI Academy:** The course is structured to take you from zero to a profitable AI business in 8 modules.
- **What is AI? (No Jargon Version):** AI is pattern recognition at massive scale - it learns from data to generate new content.
- **The AI Business Landscape in 2025:** The AI services market is massive and growing - businesses need help implementing AI, not just understanding it.
- **Setting Up Your AI Toolkit:** You can start with free tiers on most AI tools - upgrade only when you start earning.
- **Your First AI Win: Build a Lead Magnet in 30 Minutes:** AI can produce professional-quality content in minutes that would take hours manually.
- **Module 1 Quiz & Action Plan:** Knowledge without action is useless - create your plan and start executing immediately.

"The secret of getting ahead is getting started."

-- Mark Twain

Congratulations on completing Module 1! Review the key concepts, complete the practice exercises, and move on to Module 2.
