

MODULE 2

Content Creation Mastery

Create professional content at scale - writing, images, and designs that look like they cost thousands.

"It does not matter how slowly you go as long as you do not stop."

-- Confucius

LESSONS IN THIS MODULE:

1. Claude AI Fundamentals: Beyond Basic Prompts
2. The Prompt Engineering Framework
3. Business Writing with AI: Emails, Proposals & Copy
4. AI-Powered Market Research
5. Building Custom GPTs for Your Business
6. Claude AI for Client Deliverables
7. Module 2 Quiz & Practice Exercise

WavesAI Academy | Master AI Agents & Automation

Learning Objectives

By the end of Module 2, you will be able to:

- Master advanced Claude AI prompting techniques
- Understand system prompts and conversation design
- Build a reusable prompt library for common business tasks
- Master multi-step prompt chains for complex deliverables
- Write professional business emails that get responses
- Create winning proposals and persuasive sales copy using AI
- Use AI to analyse markets, competitors, and customer behaviour
- Create data-driven marketing strategies in minutes
- Create custom AI assistants tailored to specific business needs
- Understand how to train AI on business-specific knowledge
- Use Claude to create professional client deliverables quickly
- Build templates for common agency work
- Test understanding of content creation techniques
- Build a portfolio piece using all Module 2 skills

Lesson 1: Claude AI Fundamentals: Beyond Basic Prompts

Why Most People Get Bad Results from AI

The number one reason people are disappointed with AI is poor prompting. They type vague requests like "write me an email" and get generic results. In this lesson, you will learn the framework that separates amateurs from professionals.

Claude AI is particularly powerful because it excels at following complex instructions, maintaining context over long conversations, and producing nuanced, high-quality outputs. It is the preferred tool for building AI agents (which we will do later in the course).

The RACE Prompting Framework

R - Role

Tell Claude who it should be. "You are a senior marketing copywriter with 15 years of experience in the fitness industry."

A - Action

Tell Claude exactly what to do. "Write a 5-email welcome sequence for new gym members."

C - Context

Give background information. "The gym is a boutique studio targeting busy professionals aged 30-45 in London. Monthly membership is 89 GBP."

E - Examples/Expectations

Show Claude what good looks like. "Each email should be under 200 words, use a friendly tone, include one clear CTA, and follow this format: [subject line] [greeting] [value point] [CTA]."

Advanced Techniques

- Chain of Thought: Ask Claude to "think step by step" for complex tasks. This produces better reasoning.
- Few-Shot Examples: Give Claude 2-3 examples of exactly what you want before asking it to generate.
- Structured Output: Request specific formats - "Return the result as a numbered list with bold headings."
- Persona Stacking: Combine multiple roles - "You are a marketing strategist who also understands SEO and conversion psychology."

- Iterative Refinement: Ask Claude to improve its own output - "Now rewrite that but make it more conversational and add specific numbers."

Pro Tip: Save your best prompts in a document. Build a prompt library organised by task type (emails, social media, blog posts, strategies). This library becomes one of your most valuable business assets.

PRACTICE EXERCISE

Using the RACE framework, write prompts for: 1) A product description for a luxury candle brand, 2) A LinkedIn post about AI trends, 3) A client proposal for AI services. Compare results with and without the framework.

Lesson 2: The Prompt Engineering Framework

Building Your Prompt Library

Professional AI practitioners do not write prompts from scratch every time. They maintain a library of tested, refined prompts for common tasks. This lesson teaches you how to build yours.

Essential Prompt Categories

- Marketing & Sales: Email campaigns, ad copy, landing page text, sales scripts
- Content: Blog posts, social media posts, newsletters, video scripts
- Strategy: Business plans, market research, competitor analysis, pricing
- Client Work: Proposals, reports, presentations, case studies
- Automation: Workflow descriptions, chatbot scripts, SOPs

Multi-Step Prompt Chains

For complex deliverables, use prompt chains - a series of prompts that build on each other:

Step 1: Research prompt: "Analyse the top 5 competitors in [industry]. List their strengths, weaknesses, pricing, and unique selling points."

Step 2: Strategy prompt: "Based on this competitive analysis, suggest 3 positioning strategies for a new entrant. Focus on gaps in the market."

Step 3: Content prompt: "Using positioning strategy #2, write a homepage headline, subheadline, and 3 key benefit statements."

Step 4: Review prompt: "Review the content above for clarity, persuasiveness, and SEO. Suggest improvements."

Each prompt feeds into the next, creating a professional deliverable that would take hours to produce manually.

Pro Tip: When a prompt produces great results, save it immediately with a descriptive name and category. Include the context that made it work well.

PRACTICE EXERCISE

Build a prompt chain for creating a complete social media strategy for a fictional bakery. Use at least 4 connected prompts: research, strategy, content calendar, and individual post creation.

Lesson 3: Business Writing with AI: Emails, Proposals & Copy

Professional Email Templates

Email is still the backbone of business communication. AI can draft emails 10x faster than writing manually, but the key is personalisation. A generic AI email gets ignored. A personalised AI email gets results.

Cold Outreach Email Framework

Use this prompt template for cold outreach to potential clients:

"Write a cold email to [name], the [title] of [company]. They are a [type of business] in [location]. I noticed [specific observation about their business - e.g., they have no chatbot on their website / their social media posts are infrequent]. I want to offer [specific AI service]. Keep it under 150 words, conversational, and end with a soft CTA like suggesting a quick call."

Winning Proposal Structure

- Opening: Restate the client's problem in their own words
- Solution: Explain exactly what you will do (not how AI works, but what results they get)
- Process: 3-5 clear steps so they know what to expect
- Timeline: Realistic delivery dates
- Investment: Your pricing with clear deliverables
- Guarantee: Risk reversal (30-day satisfaction guarantee)
- Next Step: One clear action (book a call, reply to confirm)

Pro Tip: Always edit AI-generated emails before sending. Add one personal detail that shows you actually researched the recipient. This takes 30 seconds and doubles response rates.

PRACTICE EXERCISE

Using Claude, create: 1) A cold outreach email to a local estate agent offering AI chatbot services, 2) A follow-up email for when they do not reply, 3) A proposal template for a 1,500 GBP AI automation project.

Lesson 4: AI-Powered Market Research

Why AI Market Research is a Superpower

Market research used to cost thousands and take weeks. With AI, you can get comprehensive competitor analysis, customer insights, and market sizing in under an hour. This is one of the highest-value services you can offer clients.

The 5-Prompt Market Research Method

Step 1: Market Overview: "Analyse the [industry] market in [location/country]. What is the market size? Growth rate? Key trends? Major players? What is driving demand?"

Step 2: Competitor Deep Dive: "List the top 10 competitors in [niche] targeting [audience]. For each, provide: pricing, unique selling point, main marketing channels, strengths, and weaknesses."

Step 3: Customer Avatar: "Create a detailed customer avatar for [product/service]. Include demographics, psychographics, pain points, desires, objections to buying, and where they spend time online."

Step 4: Gap Analysis: "Based on the competitor analysis, identify 3-5 gaps in the market that a new entrant could exploit. What are customers complaining about that competitors are not addressing?"

Step 5: Strategy: "Create a go-to-market strategy for a [business type] entering this market. Include positioning, pricing recommendation, top 3 marketing channels, and first 90-day action plan."

Run all 5 prompts in sequence. You now have a comprehensive market research report that would cost 2,000-5,000 GBP from a consulting firm.

Pro Tip: Package this as a "Market Intelligence Report" and sell it to businesses for 500-1,500 GBP. Most small businesses have never had proper market research done.

PRACTICE EXERCISE

Choose an industry you are interested in and run the complete 5-prompt market research method. Save the output as a PDF report. This becomes a sample deliverable for your portfolio.

Lesson 5: Building Custom GPTs for Your Business

What Are Custom AI Assistants?

A custom AI assistant is an AI chatbot trained on specific business knowledge - product catalogues, FAQs, company policies, brand voice. Instead of generic AI responses, it gives answers tailored to that business. Think of it as a virtual employee who knows everything about the company.

Building with Claude AI (Projects)

Claude AI allows you to create Projects where you upload documents, set system prompts, and create a specialised assistant. Here is how:

Step 1: Go to Claude AI and create a new Project.

Step 2: Write a system prompt that defines the assistant's role: "You are the customer service assistant for [Business Name]. You help customers with questions about [products/services]. You are friendly, professional, and always try to resolve issues before suggesting they contact a human."

Step 3: Upload relevant documents: product catalogue, FAQ document, pricing sheet, company policies, brand guidelines.

Step 4: Set conversation rules: what to say, what not to say, when to escalate to a human, how to handle complaints.

Step 5: Test with 20-30 common customer questions. Refine the system prompt based on the responses.

What to Charge

- Basic custom assistant (FAQ bot): 300-500 GBP
- Advanced assistant (with integrations): 500-1,500 GBP
- Ongoing management and updates: 100-300 GBP/month retainer

Pro Tip: The setup takes you 2-4 hours once you know what you are doing. At 500 GBP per setup, that is 125-250 GBP per hour. Scale this by doing 2-3 per week.

PRACTICE EXERCISE

Create a custom Claude Project for a fictional coffee shop. Upload a menu (create one with AI), write a system prompt, and test it with 10 customer questions like "Do you have oat milk?" and "What are your opening hours on Sunday?"

Lesson 6: Claude AI for Client Deliverables

High-Value Client Deliverables You Can Create with AI

Here are the most common deliverables agencies and freelancers create, and how AI speeds up each one:

- Brand Strategy Document (charge 500-2,000 GBP): Mission, vision, values, positioning, messaging, visual direction
- Content Calendar (charge 300-800 GBP/month): 30 days of social media posts, blog topics, email subjects
- Website Copy (charge 500-3,000 GBP): Homepage, about, services, and contact page copy
- Marketing Audit (charge 300-1,000 GBP): Analysis of current marketing with improvement recommendations
- SOPs (charge 200-500 GBP each): Standard operating procedures for business processes
- Pitch Decks (charge 300-1,500 GBP): Investor or sales presentations

The Speed Advantage

A traditional agency takes 2-4 weeks to deliver a brand strategy document. You can create a first draft in 2 hours using Claude, refine it in another 2 hours, and deliver within 2-3 days. Your client gets faster results, you do less manual work, everyone wins.

Quality Control Checklist

- Always review AI output before sending to clients
- Add specific details that show you understand their business
- Check facts, especially statistics and claims
- Ensure brand voice consistency throughout
- Format professionally - use proper headings, spacing, and your branding

Pro Tip: Create a template for each deliverable type. Use WavesAI Studio for professional images and graphics to include in your documents.

PRACTICE EXERCISE

Create a complete brand strategy document for a fictional premium fitness studio. Include mission, target audience, brand voice, 3 key messages, and a 30-day launch plan. This is a portfolio piece you can show potential clients.

Lesson 7: Module 2 Quiz & Practice Exercise

Module 2 Review Questions

- 1. What does RACE stand for in the prompting framework?
- 2. What is a prompt chain and when should you use one?
- 3. Why should you always personalise AI-generated cold emails?
- 4. List the 5 prompts in the market research method.
- 5. What is a custom AI assistant and what can you charge for one?
- 6. Name 3 high-value client deliverables you can create with AI.
- 7. What is the most important step after AI generates content?

Portfolio Project

Create a complete "AI Marketing Package" for a fictional business. Include:

- Market research report (using the 5-prompt method)
- Brand strategy one-pager
- 7-day content calendar with actual post drafts
- Cold outreach email template
- Lead magnet PDF

Save everything in a professional folder. This package demonstrates your skills to potential clients and proves you can deliver real value.

Pro Tip: This portfolio project alone could land you your first client. When someone asks "What can you do?", show them this package and say "I created this in 4 hours. Imagine what I can do for your business."

Module Summary

Key Takeaways:

- **Claude AI Fundamentals: Beyond Basic Prompts:** The quality of your AI output is directly proportional to the quality of your prompt.
- **The Prompt Engineering Framework:** A well-organised prompt library is a business asset worth thousands.
- **Business Writing with AI: Emails, Proposals & Copy:** AI-written business communications should feel personal and specific, never generic.
- **AI-Powered Market Research:** AI market research gives you 80% of what expensive consultants deliver, in 5% of the time.
- **Building Custom GPTs for Your Business:** Custom AI assistants are one of the easiest AI services to sell to businesses.
- **Claude AI for Client Deliverables:** Speed is your competitive advantage - deliver in days what others take weeks to produce.
- **Module 2 Quiz & Practice Exercise:** Your prompt library and portfolio are your two most important business assets.

"It does not matter how slowly you go as long as you do not stop."

-- Confucius

Congratulations on completing Module 2! Review the key concepts, complete the practice exercises, and move on to Module 3.
