

MODULE 6

AI Sales & Lead Generation

Find, qualify, and convert leads into paying clients using AI-powered sales systems.

"Perseverance is not a long race; it is many short races one after the other."

-- Walter Elliot

LESSONS IN THIS MODULE:

1. AI-Powered Sales Funnels
2. AI Lead Generation Systems
3. AI Pricing & Packaging Strategies
4. Building Recurring Revenue (MRR)
 5. AI for Client Retention
6. Module 6 Quiz & Sales Plan

WavesAI Academy | Master AI Agents & Automation

Learning Objectives

By the end of Module 6, you will be able to:

- Design a sales funnel that converts visitors into customers
- Use AI to optimise every stage of the funnel
- Build automated systems that find and qualify leads
- Use AI for prospecting and outreach at scale
- Price your AI services for maximum profitability
- Create service packages that clients love
- Design services that generate predictable monthly income
- Scale from project-based to retainer-based revenue
- Use AI to keep clients happy and reduce churn
- Build systems that maximise client lifetime value
- Review sales and lead generation concepts
- Create a complete sales strategy

Lesson 1: AI-Powered Sales Funnels

The AI Sales Funnel

A sales funnel is the journey from stranger to paying customer. AI optimises every step: attracting the right people, nurturing them with personalised content, overcoming their objections, and closing the sale. Here is the framework:

- Top of Funnel (Awareness): AI-generated content, ads, and social media attract potential customers
- Middle of Funnel (Consideration): AI email sequences, chatbots, and personalised content nurture leads
- Bottom of Funnel (Decision): AI-powered sales pages, testimonials, and urgency convert leads to customers
- Post-Purchase: Automated onboarding, upsells, and referral requests maximise customer value

Building Your Funnel with WavesAI Systems

WavesAI Systems includes a funnel builder, CRM, email automation, and analytics in one platform. This means you can build a complete sales funnel for clients without needing 5 different tools.

Step 1: Create a landing page with a compelling offer (lead magnet, free consultation, demo)

Step 2: Set up a form to capture name, email, and phone number

Step 3: Connect to the email automation (welcome sequence from Module 4)

Step 4: Add a chatbot for immediate engagement

Step 5: Create the sales page with testimonials and clear pricing

Step 6: Set up follow-up sequences for people who do not buy immediately

Pro Tip: Use Claude to write all funnel copy: landing page headlines, email sequences, chatbot scripts, and sales page content. A complete funnel worth 2,000-5,000 GBP can be built in a day.

PRACTICE EXERCISE

Design a complete sales funnel for your own AI services business. Map out: landing page offer, lead capture form, 5-email nurture sequence, and sales page. Write the copy for each using Claude.

Lesson 2: AI Lead Generation Systems

Finding Clients with AI

The number one challenge for any AI service provider is finding clients. AI solves this by automating prospecting, personalising outreach, and qualifying leads before you even speak to them.

AI Prospecting Methods

- Google Maps scraping: Find local businesses that need AI services (no chatbot, poor reviews, inactive social media)
- LinkedIn outreach: Use AI to write personalised connection messages and follow-ups
- Cold email campaigns: AI writes personalised emails based on the prospect's website and business
- Content marketing: Publish AI-generated content that attracts inbound leads
- Referral automation: Automated follow-up with happy clients asking for referrals

The AI Qualification Process

Not every lead is a good fit. Use AI to qualify leads before you invest time in sales calls:

Step 1: Lead fills in a form or responds to outreach

Step 2: AI chatbot asks qualifying questions: budget, timeline, specific needs

Step 3: Based on answers, AI scores the lead (hot, warm, cold)

Step 4: Hot leads get an immediate calendar link for a call

Step 5: Warm leads enter a nurture sequence

Step 6: Cold leads get added to a long-term follow-up list

Pro Tip: Set a goal of reaching out to 10 potential clients per day. With AI writing your emails and automating follow-ups, this takes less than 30 minutes.

PRACTICE EXERCISE

Find 20 local businesses that could benefit from AI services. For each one, identify a specific problem AI could solve (no chatbot, poor social media, manual booking process). Write a personalised cold email for the top 5 using Claude.

Lesson 3: AI Pricing & Packaging Strategies

Pricing Your AI Services

The biggest mistake new AI service providers make is charging by the hour. If you build a chatbot in 3 hours and charge 50 GBP/hour, you earn 150 GBP. But that chatbot saves the client 20 hours per week of customer service time. That is worth 2,000+ GBP to them. Charge based on value, not time.

Recommended Pricing Structure

- Starter Package (500-1,000 GBP): One AI system (chatbot OR automation OR content). Good for getting testimonials.
- Growth Package (1,500-3,000 GBP): 2-3 AI systems + monthly management. Your core offer.
- Premium Package (3,000-5,000 GBP): Complete AI transformation - chatbot + automation + content + voice agent. For serious clients.
- Monthly Retainers (300-2,000 GBP/month): Ongoing management, updates, and optimisation. Your recurring revenue.

The Pricing Conversation

Use this framework when discussing pricing with clients:

- Ask about their current costs: "How much time does your team spend on [task] each week?"
- Quantify the problem: "At [hourly rate], that is [cost] per month on [task] alone."
- Present the solution: "My AI system handles this automatically for a one-time investment of [price] plus [retainer] per month."
- Show the ROI: "You will save [amount] per month. The system pays for itself in [timeframe]."

Pro Tip: Always present 3 pricing options (Good, Better, Best). Most clients choose the middle option. This is called anchoring - the premium option makes the middle one feel like a deal.

PRACTICE EXERCISE

Create a complete pricing page for your AI services business. Include 3 packages with clear descriptions, features, and pricing. Use Claude to write compelling descriptions that focus on outcomes, not features.

Lesson 4: Building Recurring Revenue (MRR)

Why MRR Changes Everything

One-off projects are feast or famine. Monthly retainers are predictable income. If you have 10 clients paying 500 GBP/month, that is 5,000 GBP/month or 60,000 GBP/year - all recurring. With AI doing most of the work, your actual time investment per client is minimal.

MRR Service Ideas

- AI chatbot management: 200-500 GBP/month (monitor, update knowledge base, optimise)
- Social media management: 500-2,000 GBP/month (AI content creation + scheduling)
- SEO content publishing: 300-1,000 GBP/month (daily AI articles)
- Email marketing: 300-800 GBP/month (AI sequences + campaigns)
- Voice agent management: 200-500 GBP/month (monitor calls, update scripts)
- Full AI marketing suite: 1,500-3,000 GBP/month (all of the above)

The MRR Growth Path

Step 1: Month 1-2: Land 2-3 clients at 300-500 GBP/month each (MRR: 600-1,500 GBP)

Step 2: Month 3-4: Add 2-3 more clients, upsell existing ones (MRR: 2,000-4,000 GBP)

Step 3: Month 5-6: Reach 8-10 clients, introduce higher-tier packages (MRR: 5,000+ GBP)

Step 4: Month 7+: Hire a virtual assistant for admin, focus on sales and strategy (MRR: 8,000+ GBP)

WavesAI Academy MRR Opportunity

As a WavesAI Academy student, you also have the option to resell the course with a 50/50 revenue split. This means every time someone buys the course through your referral, you earn recurring income. Combined with your services, this creates multiple revenue streams.

Pro Tip: Start every client relationship with a one-off project, then transition to a retainer. The project proves your value, the retainer locks in recurring revenue.

PRACTICE EXERCISE

Create your personal MRR plan. List 5 services you will offer as monthly retainers, your pricing for each, and how many clients you need to reach 5,000 GBP MRR. Set a target date.

Lesson 5: AI for Client Retention

The Retention System

Acquiring a client costs 5x more than keeping one. Yet most service providers spend 90% of their effort on acquisition and almost nothing on retention. AI automates retention so you keep clients for years, not months.

Automated Retention Touchpoints

- Monthly report: Automated AI-generated performance report showing the value you deliver
- Quarterly review call: Scheduled automatically, agenda prepared by AI
- Check-in emails: "How are things going? Any new challenges?" sent automatically
- Proactive suggestions: AI analyses their data and suggests new services or improvements
- Anniversary acknowledgement: Automated message on their 1-year client anniversary
- Referral request: Timed perfectly after a positive review or result

The Monthly Report Template

Create this report automatically each month using AI and Make.com:

- Key metrics: chatbot conversations, leads captured, emails sent, social media engagement
- Highlights: Best performing content, most asked chatbot questions, new leads
- Improvements made: Updates, optimisations, new features added
- Recommendations: AI-generated suggestions for next month
- ROI calculation: Show the monetary value of your services

Pro Tip: The monthly report is your secret weapon. Clients who see regular proof of value almost never cancel. Automate it with Make.com so it takes zero effort after initial setup.

PRACTICE EXERCISE

Design a monthly report template for a fictional client. Include sections for all the items listed above. Use Claude to generate sample data and write the report narrative. Create this in a professional document or spreadsheet.

Lesson 6: Module 6 Quiz & Sales Plan

Module 6 Review Questions

- 1. Describe the 4 stages of an AI sales funnel.
- 2. What are 5 methods for finding potential clients?
- 3. Explain value-based pricing vs hourly pricing.
- 4. What is MRR and why is it important?
- 5. Name 5 AI services you can offer as monthly retainers.
- 6. What should a monthly client report include?
- 7. How does the lead qualification process work with AI?

Portfolio Project: Your Sales Plan

- Complete pricing page with 3 packages
- Cold outreach templates (email, LinkedIn, phone script)
- Sales funnel design with copy for each stage
- Monthly report template
- MRR growth plan with targets for 6 months

Module Summary

Key Takeaways:

- **AI-Powered Sales Funnels:** A well-designed AI funnel converts 3-5x better than a traditional website because it guides people through a personalised journey.
- **AI Lead Generation Systems:** AI lead generation means you never run out of potential clients - the system finds them for you.
- **AI Pricing & Packaging Strategies:** Value-based pricing means charging for the result, not the hours. AI services deliver massive value in minimal time.
- **Building Recurring Revenue (MRR):** Monthly recurring revenue is the key to a sustainable AI business - aim for 5,000 GBP MRR within 6 months.
- **AI for Client Retention:** Keeping a client costs 5x less than finding a new one. AI makes retention effortless.
- **Module 6 Quiz & Sales Plan:** You now have the knowledge to find, close, and retain clients for your AI services business.

"Perseverance is not a long race; it is many short races one after the other."

-- Walter Elliot

Congratulations on completing Module 6! Review the key concepts, complete the practice exercises, and move on to Module 7.
