

MODULE 7

White-Label AI SaaS

Build recurring revenue by offering AI tools under your own brand - the ultimate scalable business model.

"Fall seven times, stand up eight."

-- Japanese Proverb

LESSONS IN THIS MODULE:

1. Choosing Your AI Business Model
2. Building Your AI Brand & Portfolio
 3. Getting Your First 5 Clients
 4. Scaling with Systems & Team
5. BUILD PROJECT: Social Media Management Agent
6. Module 7 Quiz & Graduation Preparation

WavesAI Academy | Master AI Agents & Automation

Learning Objectives

By the end of Module 7, you will be able to:

- Evaluate different AI business models
- Choose the right model for your goals and skills
- Create a professional brand for your AI business
- Build a portfolio that wins clients
- Execute a practical client acquisition plan
- Close your first paying clients within 30 days
- Build systems that let you serve more clients without working more hours
- Know when and how to hire help
- Build a complete social media management AI agent
- Deploy it as a portfolio piece and client offering
- Review white-label and scaling concepts
- Prepare for Module 8 (final module)

Lesson 1: Choosing Your AI Business Model

AI Business Models

There are multiple ways to build an AI business. Each has different income potential, time investment, and complexity. Here are your options:

- Freelancer: Sell your skills project by project. Income: 2,000-8,000 GBP/month. Pros: Low overhead, start immediately. Cons: Trading time for money.
- Agency: Build a team, take on bigger clients. Income: 10,000-50,000 GBP/month. Pros: Scalable, higher revenue. Cons: Management overhead.
- White-Label SaaS: Resell AI tools under your brand. Income: 5,000-30,000 GBP/month. Pros: Recurring revenue, no development needed. Cons: Requires sales skills.
- Course Creator: Teach AI skills to others. Income: Variable, potentially unlimited. Pros: Passive income potential. Cons: Requires audience building.
- Hybrid (Recommended): Combine 2-3 models. Example: Agency + white-label + course reselling.

White-Label with WavesAI Systems

WavesAI Systems is built for white-labelling. You can offer the entire platform (CRM, email, automation, website builder, AI tools) under your own brand. Your clients see your logo, your domain, and your branding - they never know it is WavesAI Systems under the hood.

- Custom domain: yourbrand.com instead of wavesaisystems.com
- Custom logo and colours throughout the platform
- Your branding on all emails and notifications
- Sub-accounts for each of your clients
- You set the pricing for your clients

Pro Tip: The white-label model is the fastest path to 10,000 GBP/month MRR. You are selling a proven platform, not building something from scratch. Focus on sales, not development.

PRACTICE EXERCISE

Write a business plan for your AI business. Choose your primary model and 1-2 secondary models. Define your target market, services, pricing, and 90-day goals.

Lesson 2: Building Your AI Brand & Portfolio

Building Your Brand

Your brand is more than a logo. It is the promise you make to clients and the experience you deliver. Here is how to create a professional AI brand from scratch:

Step 1: Choose your business name: Use Claude to brainstorm options. Something professional, memorable, and related to AI/technology.

Step 2: Create your visual identity: Use WavesAI Studio to generate logo concepts, brand colours, and design assets.

Step 3: Build your website: Use WavesAI Systems website builder or WordPress. Include: services, about, portfolio, testimonials, contact.

Step 4: Set up your social profiles: LinkedIn (essential), Instagram, Twitter. Post consistently.

Step 5: Create your email signature: Professional, includes your name, title, phone, and website.

Your Portfolio (What to Include)

By now you have built multiple portfolio pieces throughout this course. Organise them professionally:

- Module 1: Lead magnet sample
- Module 2: Market research report, brand strategy document, content calendar
- Module 3: Voice agent demo, video samples, Customer Service AI Agent
- Module 4: Automation workflow screenshots, email sequences
- Module 5: SEO strategy document, sample article
- Module 6: Sales funnel design, pricing page, cold outreach templates

Pro Tip: Create a portfolio page on your website. For each project, include: the problem, your solution, and the result. Even if these are sample projects, present them professionally.

PRACTICE EXERCISE

Create your AI business brand. Choose a name, generate a logo with WavesAI Studio, define your brand colours, and write your elevator pitch (30 seconds explaining what you do and who you help).

Lesson 3: Getting Your First 5 Clients

The First 5 Client Plan

Getting your first clients is the hardest part. After that, referrals and results do the heavy lifting. Here is a proven 30-day plan to land your first 5 paying clients:

Week 1: Warm Network

- Tell everyone you know that you offer AI services for businesses
- Post on your personal social media about what you are doing
- Message 20 people in your network who own businesses or know business owners
- Offer a free AI audit or consultation to the first 3 people who respond

Week 2: Local Businesses

- Visit 10 local businesses and introduce yourself
- Bring a printed one-pager showing what AI can do for their specific industry
- Offer a free demo - show them an AI chatbot or content generator in action
- Follow up within 24 hours with a personalised email (written by Claude)

Week 3: Online Outreach

- Send 50 personalised cold emails to businesses that need AI services
- Connect with 20 business owners on LinkedIn with personalised messages
- Join 3 Facebook groups or forums where your target clients hang out
- Provide free value in those groups (answer questions, share tips)

Week 4: Convert & Close

- Follow up with everyone from weeks 1-3 who showed interest
- Offer a "founding client" discount (20% off) for the first 5 clients
- Book discovery calls and use the sales framework from Module 6
- Close at least 2-3 paying clients

Pro Tip: The key is volume. You will hear "no" more than "yes" at first. That is normal. Every rejection gets you closer to a yes. Aim for 10 conversations per day.

PRACTICE EXERCISE

Execute Week 1 of the plan right now. Make a list of 20 people in your network who own businesses or know business owners. Draft a message to each one using Claude. Send them today.

Lesson 4: Scaling with Systems & Team

Scaling Without Burning Out

The goal is not to work 80-hour weeks with 20 clients. The goal is to serve 20+ clients while working 30-40 hours because your systems do the heavy lifting.

Systems to Build First

- Client onboarding automation (Module 4) - every new client gets the same professional experience
- Monthly reporting automation - AI generates reports, you just review and send
- Content creation pipeline - batch create, schedule, publish automatically
- Lead generation system - outreach, follow-ups, and qualification on autopilot
- Financial tracking - invoicing, expense tracking, revenue dashboard

When to Hire

Hire when you have more work than you can handle AND consistent revenue. Start with:

- Virtual Assistant (200-500 GBP/month): Admin, scheduling, basic client communication
- Content Creator (300-600 GBP/month): Social media management for your clients
- Sales Setter (commission-based): Book discovery calls for you
- Account Manager (salary): Manage existing client relationships

Pro Tip: Use AI to train your team. Create SOPs using Claude, record Loom videos of your processes, and build a knowledge base. New hires can onboard themselves in days instead of weeks.

PRACTICE EXERCISE

Create a "Scale Plan" document: list every task you do weekly, categorise each as (1) automate, (2) delegate, or (3) do myself. For category 1, outline the automation. For category 2, write a job description.

Lesson 5: BUILD PROJECT: Social Media Management Agent

Your Second Agent Build

In Module 3, you built a Customer Service Agent. Now you will build a Social Media Management Agent - an AI system that creates, schedules, and manages social media content for a business. This is your advanced portfolio piece.

What You Are Building

An AI agent that: generates content ideas based on the business and industry, writes platform-specific posts (LinkedIn, Instagram, Twitter, Facebook), creates matching images using AI, schedules posts at optimal times, suggests hashtags and engagement strategies, and reports on content performance.

Build Steps

Step 1: DEFINE THE CLIENT: Choose a business type. Document their brand voice, target audience, content pillars, and goals.

Step 2: CREATE THE SYSTEM PROMPT: "You are a social media manager for [Business]. Your goal is to create engaging content that builds brand awareness and drives leads. Follow these brand guidelines: [voice, topics, dos/don'ts]. Create content for: LinkedIn (professional, thought leadership), Instagram (visual, lifestyle), Twitter (punchy, conversational)."

Step 3: BUILD THE CONTENT PIPELINE: Use Claude to generate a month of content ideas. For each idea, generate the post copy for each platform.

Step 4: CREATE VISUALS: Use WavesAI Studio to generate images for each post. Create templates for consistent branding.

Step 5: SET UP SCHEDULING: Connect to WavesAI Systems or Buffer. Schedule all posts with optimal timing.

Step 6: BUILD THE AUTOMATION: Use Make.com to connect: Claude (content generation) > WavesAI Studio (images) > Scheduling tool (publishing).

Step 7: CREATE THE REPORTING TEMPLATE: Design a weekly/monthly report showing posts published, engagement metrics, and recommendations.

Pricing This Service

- Setup fee: 500-1,000 GBP (strategy, system build, first month content)

- Monthly retainer: 500-2,000 GBP (ongoing content, scheduling, reporting)
- Per client time investment: 3-5 hours/month (AI does the rest)

Pro Tip: Run this system for your own business first. Your social media presence serves as proof that the system works. When clients ask, show them your accounts and say "I use the same system I am proposing for you."

PRACTICE EXERCISE

Complete the full build. Create 2 weeks of scheduled content for a fictional business. Take screenshots of the entire system. Write a case study describing the setup, process, and expected results.

Lesson 6: Module 7 Quiz & Graduation Preparation

Module 7 Review Questions

- 1. What are the 5 AI business models and which combines best?
- 2. How does white-labelling WavesAI Systems work?
- 3. Describe the 4-week plan for getting your first 5 clients.
- 4. What systems should you build before hiring?
- 5. What does your Social Media Management Agent do?
- 6. How much can you charge for social media management as a service?
- 7. What is the recommended path to 10,000 GBP MRR?

Course Progress Check

By now you should have:

- A prompt library with 50+ tested prompts
- A portfolio with 6+ sample deliverables
- Two working AI agents (customer service + social media)
- A complete pricing page with 3 packages
- A sales funnel design
- Cold outreach templates
- Your brand identity (name, logo, website)
- At least 1-2 conversations with potential clients

If you are missing any of these, go back and complete them before starting Module 8. Module 8 is about launching and scaling - you need these foundations in place.

Module Summary

Key Takeaways:

- **Choosing Your AI Business Model:** White-label AI lets you sell proven technology under your brand without building anything from scratch.
- **Building Your AI Brand & Portfolio:** Your brand and portfolio are what separate you from the thousands of others offering AI services.
- **Getting Your First 5 Clients:** Your first 5 clients come from direct outreach, not passive marketing. Be proactive.
- **Scaling with Systems & Team:** Systems first, team second. Automate everything you can before hiring anyone.
- **BUILD PROJECT: Social Media Management Agent:** You now have TWO working AI agents in your portfolio - a customer service agent and a social media agent.
- **Module 7 Quiz & Graduation Preparation:** You are one module away from completing the course. You now have the skills, tools, and agents to launch your AI business.

"Fall seven times, stand up eight."

-- Japanese Proverb

Congratulations on completing Module 7! Review the key concepts, complete the practice exercises, and move on to Module 8.
